

Securing

Federal Project Funding

Keck & Wood's knowledge and experience has secured \$30M+ in project grants from 12+ different organizations on behalf of our clients and their infrastructure projects.

Planning & Research

- Assist the City in developing the project scope based on its greatest need(s) to strengthen the chances of receiving a grant. Assessment to include preliminary schedule durations and cost estimate; communities, neighborhoods, and population impacted; information important for grant and/or loan applications.
- With a defined scope, the KW team can assist in finding potential grants and/or loans from state & national programs. We can leverage our experience from GEFA, GDOT, CDBG, USDA and other programs.

Project Definition | Applications

- Assist with review of available grant programs and loan options. For example, GEFA has four different loan options and utilizes a rolling deadline process. CDBG focuses on low to moderate income areas; USDA helps communities below certain population levels. We can provide clarity.
- Prepare the Engineering Report (PER), if required. The PER will state the feasibility, impact, benefit, general characteristics, and cost of the improvements necessary, and include explanations, exhibits, and maps required under grant guidelines.

Project Execution | Goals & Performance Reporting

- As the project construction begins, the KW team will start the construction administration process, which will monitor the overall project and provide the required reporting information for the grants and/or loans.
- For municipalities that do not have a grant administrator, the KW team can act as an extension of your staff to fulfill the administrative needs of the grant and/or loan.
- KW can assist in the reporting for grant and loan programs across the Southeast. For example, the State of Georgia has eight different sub-programs within their CDBG program. KW can help navigate the necessary reporting for each of these entities to ensure full compliance.

The Keck & Wood grant team is ready to address any current or upcoming grant program to strengthen your infrastructure.

Keck +Wood is Dedicated to **Serving Communities:**

Serving

80+

Local Governments
Across Georgia

Expertise In More Than

30

Different Engineering
& Planning Disciplines

Keck + Wood is

100%

Employee
Owned

Years Providing

65+

Engineering Solutions
Across the Southeast

“Our firm and staff have extensive experience with infrastructure improvements involving engineering grant services.”
